```typescript
1   import { Component, OnInit } from '@angular/core';
2   import {ActivatedRoute} from '@angular/router'
3   import {RestaurantsService} from '../restaurants/restaurants.service'
4   import {Restaurant} from '../restaurants/restaurant/restaurant.model'
5
6   @Component({
7       selector: 'mt-restaurant-detail',
8       templateUrl: './restaurant-detail.component.html'
9   })
10  export class RestaurantDetailComponent implements OnInit {
11
12      restaurant: Restaurant
13
14      constructor(private restaurantsService: RestaurantsService,
15                  private route: ActivatedRoute) { }
16
17      ngOnInit() {
18        this.restaurantsService.restaurantById(this.route.snapshot.params['id'])
19          .subscribe(restaurant => this.restaurant = restaurant)
20      }
21
22  }
23
```
